The Power of Integration in Policing

Analyst at crime center working

"ShotSpotter alerts are the foundation for a multi-technology response that enables us to have the real-time intelligence to respond and investigate. If you shoot a gun in the city of San Pablo, the odds of us identifying you and finding you are really high."

Chief Brian Bubar
San Pablo Police

5 Considerations When Choosing an ALPR Solution

Not all ALPR systems are created equal. Law enforcement agencies need a reliable, accurate, cost-effective solution that can be integrated with other solutions, providing suspect vehicles and other investigative help while optimizing resources.

City of Utica, New York

Utica, NY Skyline

"Adding this level of integrated technology to our public safety capabilities is exactly what we need to increase the level of detail when investigating incidents of potential gun violence."

Mayor Mike Galime
City of Utica, NY

Read Case Study >

The Utica Police Department's major crime review from 2024 revealed both a decrease in gun crime and an increase in solved gun crime investigations. Lieutenant Michael Curley also credited the crime reduction to the Utica Police Department's investment in various force-multiplying technologies. "We invested a lot in technology such as license plate readers, cameras, and ShotSpotter. So I think if you put everything together, it is really paying off," he said.
